General Description

The A80486DX4100, also known as the Intel 486 DX4-100, is a microprocessor chip produced by Intel in the 1990s. Here are some of its features:

Features

Clock speed: 100 MHz

Manufacturing process: 0.6-micron technology

Instruction set: x86

Cache: 16 KB internal cache

Transistors: 1.2 million

Voltage: 5 volts

Application

General computing tasks, such as word processing, spreadsheet analysis, and web browsing.

Graphics-intensive applications, such as gaming and image editing.

Scientific and engineering applications, such as simulation and modeling.
