General Description

DA28F640J5-150 is a flash memory chip manufactured by Intel Corporation. Here are some of its features:

Features

It has a capacity of 64 megabits (Mb), or 8 megabytes (MB) of data storage.

It operates at a voltage range of 2.7V to 3.6V.

It has a 150 nanosecond (ns) access time for reading data.

It uses a parallel interface to communicate with the host device.

Application

It can be used in various electronic devices such as digital cameras, printers, set-top boxes, and routers, to store firmware, operating systems, and other data.

It can also be used in automotive applications, such as in-car infotainment systems, where it is used to store audio, video, and navigation data.

It can be used in industrial applications where high-performance non-volatile storage is required.
