

Precision Amplifiers DUAL PRECISION LOW IB OP

Manufacturers	Analog Devices, Inc
Package/Case	8-PDIP
Product Type	Amplifier ICs
RoHS	Rohs
Lifecycle

General Description

The OP297FPZ is a precision op-amp that offers high gain accuracy, low input offset voltage, and low noise characteristics. It is designed to provide precise amplification and signal conditioning in applications where accuracy and low offset voltage are critical.

Features

- Precision operational amplifier IC
- High gain accuracy
- Low input offset voltage
- Low noise performance
- Wide supply voltage range
- Rail-to-rail input and output capability
- High slew rate

Application

- Instrumentation amplifiers
- Data acquisition systems
- Medical instrumentation
- Active filters
- Precision voltage and current amplification
- Sensor signal conditioning
- Test and measurement equipment
