

Trans MOSFET N-CH 40V 32A 8-Pin TDSON EP T/R

Manufacturers	Infineon Technologies Corporation
Package/Case	tdson-8
Product Type	Transistors
RoHS	Green
Lifecycle

General Description

OptiMOS™ 5 power MOSFET in SuperSO8 package offers the latest technology together with temperature improvements in the package. This new combination enables higher power density as well as improved robustness.

Compared to lower rated devices, the 175°C T_{J_MAX} feature offers either more power at a higher operating junction temperature or longer lifetime at the same operating junction temperature. Furthermore, 20% improvement in the safe operating area (SOA) is achieved. This new package feature is the perfect fit for applications such as telecom, motor drives and server.

Features

- Low RDS(on)
- Optimized for synchronous rectification
- Enhanced 175°C capability in SuperSO8
- Longer life time
- Highest efficiency and power density
- Highest system reliability
- Thermal robustness

Application

- Motor drives
- Server
- Telecom
