## General Description

MAX14752EUE+ is a specific integrated circuit (IC) produced by Maxim Integrated. It is a highly integrated power management solution designed to provide power to a variety of systems, such as sensors, industrial equipment, and portable medical devices.

### Features

- Dual input power paths with load switches
- 2.5 V to 5.5 V input voltage range
- Dual synchronous step-down regulators
- I2C serial interface
- Overvoltage and undervoltage protection
- Overcurrent protection
- Thermal shutdown protection

### Application

- Industrial equipment and automation systems
- Portable medical devices
- Smart sensors and monitoring systems
- Home automation and security systems
- Battery-powered devices and systems
