General Description

RC28F128J3F75 is a flash memory device produced by Intel. Here are some of its features:

Features

It has a capacity of 128 megabits (16 megabytes).

It uses a parallel NOR flash interface.

It operates at a voltage range of 2.7V to 3.6V.

It has a 75ns access time.

Application

Storing program code and data in embedded systems.

Serving as non-volatile memory in networking and telecommunications equipment.

Providing firmware storage in consumer electronics devices.
